

Miele S5 Vacuum Cleaner Series

Must a Vacuum Cleaner Be So Perfect? In Order To Be a Miele... Yes it Does

Quality. Quality. Quality. Miele's maxim, for everything!

S5 vacuum cleaners are manufactured at Miele's Bielefeld factory in Germany where every effort is made to embrace the company's 107-year motto of Immer Besser or Forever Better. Endurance testing in custom-built laboratories forms an intrinsic part of quality assurance on all Miele vacuum cleaners. Before any production process begins, all components are put through rigorous tests and subjected to enormous strain' stress that exceeds typical residential household use. In fact, every unit is put through a final quality test, not just one in every hundred or two per production run, ensuring that your home is not a testing ground. Only when all components, electronics and floor tools have successfully passed each critical exam will the Miele brand name be bestowed on them.

Excellent maneuverability

The three smooth-running 360° castor wheels mounted on steel axles ensure maximum stability and maneuverability for your vacuum cleaner. They are cleverly designed with a travel ramp to help you maneuver your vacuum easily over thresholds and around obstructions.

Wide operating radius

The S5 is fitted with an extra long cable to avoid the need of having to change sockets halfway through vacuuming. Together with the hose and suction tube, you have an operating radius of 29½ feet.

Six level power adjustment

The power setting on the new S5 can be adjusted on six levels, depending on the type of flooring you're cleaning or surface you're dusting. Easy to understand graphic symbols indicate which setting is best suited for different kinds of surfaces, such as rugs and carpets, drapes or hard floors. On select models, the power levels are back-lit, making it easier to find the right setting.

Purposeful design

Miele vacuum cleaners are instantly identifiable by their unique design and stylish character. Careful attention is paid to every curve, angle and line ensuring that the only thing rivaling the vacuum's beauty is its functionality. Skillfully crafted to provide easy operation, effortless movement and remarkable efficiency ' Miele's beauty is far more than skin deep.

Responsive Features Make Your Life Easier

Intelligent automatic setting When the automatic setting is selected, the power level of the vacuum cleaner adjusts automatically to suit the floor surface currently being cleaned and ensures the most economical use of energy. And because the guesswork has been eliminated, there is no need for you to adjust the power level yourself.

Silence setting

All Miele vacuums are known for their quiet operation, but a special sound insulation makes the S5 particularly quiet. The new silence setting combines the lowest noise output with the ideal power level for optimum cleaning results.

Convenient park system

For short breaks, the wand and floor tool can simply be inserted into the park system on the back of the barrel. This allows you to answer the door or the telephone without having to find an unsafe resting place for the wand or laying it on the floor. On selected models, the park system also switches off the motor, saving you time when you are interrupted.

Double-sided wand holder

For safe storage and easy transportation, two fittings allow the telescopic wand assembly to be hooked onto the barrel when it is upright one on either side. So no matter whether you are right-handed or left-handed, the S5 offers you an ideal solution. If you need to carry the vacuum cleaner up and down stairs, you will have the other hand free to hold on to the railing.

Durable bumper strip

The fully integrated bumper strip made from soft plastic goes all the way around the vacuum to protect both furniture and the vacuum in the event of a collision.

Fully integrated set of accessories

To ensure that accessories don't go missing, the S5 features a neat, on-board storage compartment. A crevice nozzle for hard to reach corners, an upholstery tool for all those crumbs on the couch and a dusting brush for the cobwebs in the corners are always on hand, whenever you need them.

Pisces (S5280) Royal Blue

Suction control via rotary dial
1200-watt, Miele-made Vortex Motor System™
Sealed System™ construction
4.76-quart IntensiveClean Plus' dustbag with flap for dust-free removal (2 supplied)
Active HEPA Filter (1 supplied)
Turbobrush (STB 205-3)
Parquet Floor Brush (SBB 300-3)

Non-electric hose
Stainless steel telescopic wand
Three integrated accessories: natural bristle dusting brush, upholstery nozzle, crevice tool
29½ foot operating radius
Dustbag change indicator
Filter grill
Safety shut-off on overheating
Space-saving storage bracket on each side of the vacuum

Callisto (S5280) Deep Black

Suction control via rotary dial
1200-watt, Miele-made Vortex Motor System™
Sealed System™ construction
4.76-quart IntensiveClean Plus' dustbag with flap for dust-free removal (2 supplied)

Active HEPA Filter (1 supplied)
Electric Powerbrush (SEB 217-3)
Parquet Floor Brush (SBB 300-3)
Deluxe handle
Electric hose (SES 119)
Electric, stainless steel telescopic wand
Three integrated accessories: natural bristle dusting brush, upholstery nozzle, crevice tool
29½ foot operating radius
Dustbag change indicator
Filter grill
Safety shut-off on overheating
Space-saving storage bracket on each side of the vacuum

Silence insulation
Recommended for medium pile carpeting
and smooth flooring

carpeting and smooth flooring

Breathe Easy, With a Little Help From Miele

For over 75 years, our research, development and quality control laboratories have tested methods to effectively pick up and, most importantly, retain dust and other indoor air pollutants. After collecting volumes of data, engineers and designers continue to reach the firm conclusion that Miele's system is the most effective and hygienic method of removing particulate matter from the home. Our exclusive combination of a Sealed System™ using the very best raw materials, electrostatically charged IntensiveClean Plus dust/filter bag and a selection of high quality filter cartridges, including the first certified HEPA filter, provide the essential formula for this success. As a matter of fact, the S5 vacuum series has been awarded certification by the DMT Air Quality Testing Institute, an independent institute that monitors air hygiene. The S5 joins other Miele vacuums — which were the world's first to receive this certificate — with a top rating of "excellent air quality" This certification refers to Miele's HEPA filter and the vacuum cleaner working together as a Sealed System™ to provide maximum protection for indoor air quality.

Please exercise caution when evaluating other vacuum filtration systems, since there are many gimmicks used to sell vacuum cleaners which do not work as effectively as ours and claims of

performance which cannot be proven scientifically. As this is an area where the results can be devastating to young or elderly lungs, or to anyone who suffers from allergies or asthma, you may want to visit a local authorized Miele dealer to discuss the importance of the indoor air quality in your home and how Miele vacuum cleaner can improve it.
